

### Q3. What's your motivation?

- (a) As an intern at Spoonshot, I would like to deeply understand the AI that led to your company's formation, which revolves around the fundamental of Food and Beverage Intelligence. I want to understand the profoundness of the application of Data Science in a real-world problem. I also want to understand the research behind publishing the reports and the blogs that help impact society.
- (b) Data Science and ML intrigue me the most because of the Mathematics present. Analysing data to have insightful information is very exciting. I feel that this is the new branch of Applied Maths that will drive many companies worldwide. Plus, I think this field offers colossal scope for problem-solving.
- (c) If given a full-time offer as a Data Scientist at Spoonshot, I would like to understand the customer expectation related to any food item or a new recipe that is introduced in the market, the kind of response they have, the kind of interaction they have with that food time will provide a lot of insights to work on and give the consumers the best product.
